### RESULTS:

20% less Co2 output  
2012 - 2016

### RESULTS:

>10% savings  
2015 - 2016

# Private lease: The future?

- In 2015, we selected a private leasing supplier within NL;
- The private lease offer was fully rebuilt to make it “DSM fit”
- High service - competitive pricing: Leasing must be more attractive than buying;
- On April 17<sup>th</sup> 2015, we launched the private lease offer within NL;
- >5000 employees can now lease a private car directly from the supplier;
- Free OEM choice, plus a temporary volume deal / offer.
- The results are:
  - > 130 cars ordered in the first 3 months;
  - High employee satisfaction - even company car drivers willing to switch!
  - Pricing and service agreements new ‘benchmark’ for traditional leasing;

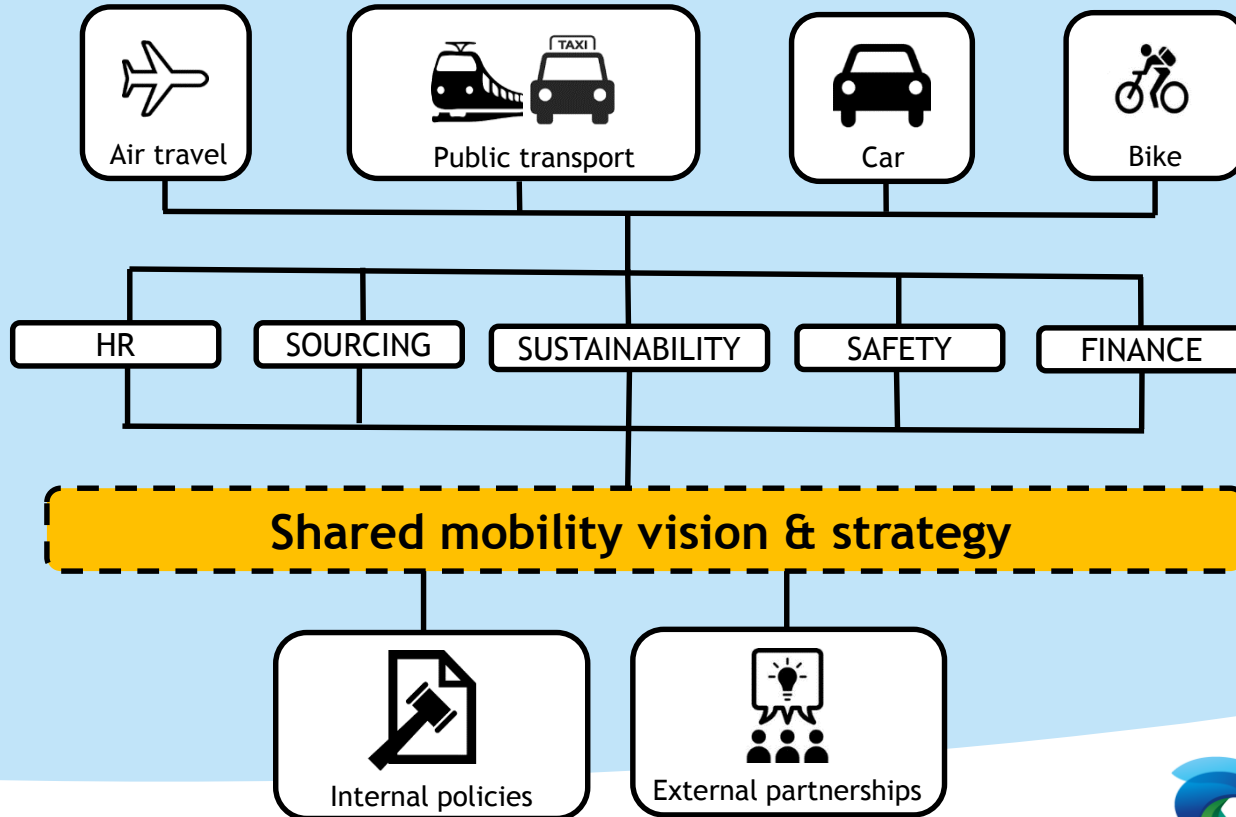

Building further:

How do we translate our sustainability mission  
into a mobility strategy?

# Shared Mobility Vision & Strategy

# Mobility strategy driven by global megatrends:

# Initiatives 2017 and further

- Define the **Total Impact** of **Mobility**:
  - Sustainability: Co2 output / NoX output
  - Employee satisfaction / employer attractiveness;
  - Costs and value

- Global supplier ships to easily collect data collection and integration;
- Integrate local supplier solutions such as (e-) car sharing;
- Offer app based booking tool steer and track mobility choices;

## The End.

Of this presentation, I will continue my challenge 😊

**BRIGHT SCIENCE. BRIGHTER LIVING.™**
